GOVERNMENT GREEN TAX-GOUGING IS COMING

Today Newfoundlanders are lining up in arms about a 15% increase in gas prices by their provincial Liberal government.

The Liberal government are just amateur pikers in Newfoundland, folks. Here in Alberta, where the professional NDP pikers rule, heating with natural gas is going up 70% with NDP's (carbon) tax!

Yesterday prices per GJ for home heating natural gas was \$2.20. NDP's Notley unconscionably wants a \$1.50 levy per GJ on top next year – that's 70% tax gouging, folks, on the greenest of home heating products.

Unlike auto fuel, home heating gas is not a luxury. There are no green alternatives. It's a basic human need in Canada to survive.

The world's polluters are not home owners trying to keep warm. The polluters are the Asian countries that manufacturer your toasters, televisions, your solar panels with power from dirty coal-fired power plants. Put a carbon tax on their products when they are imported into Canada. We need to be able to afford to heat our homes for our families. Albertans should rise up against this barbaric NDP tax gouging!

What do you think?

Peter Goldring, MP
